The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/792,267	Applicant(s) SIMON, KLAUS	
	Examiner Ren L. Yan	Art Unit 2854	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 August 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 and 10-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Jeans (7,070,406).

With respect to claims 1, 3, 6, 7, 10 and 12, the patent to Jeans teaches the structure of a printing apparatus as claimed including a curved member 100(embossing belt) carrying a stationary stamp surface, when not in use, having a plurality of separate curved sides as defined by the three rollers 103, said stamp surface including an embossing pattern, wherein in use, said curved member is configured to roll over a substrate 101 to be printed on with said pattern; a resist mechanism 300 for providing a layer of resist on the substrate 101, and an illumination system 99 disposed inside the curved member 100 configured to direct light to a region of contact between said stamp surface and said substrate. See Fig. 39 and column 6, lines 22-35, column 8, lines 25-38, and column 18, lines 4-48 in Jeans for details.

With respect to claims 2 and 11, Jeans teaches in Fig. 39 that the curved member is a belt 100 that forms a triangular cross section with curved sides.

Regarding claims 4 and 13, the light 99 and the reflector 99r used in Jeans is considered

as the thermal elements that is capable of being configured to control temperature of said curved member, to align said stamp surface, and to correct magnification of said stamp surface as recited.

Regarding claims 5 and 14, Jean teaches in one embodiment in Fig. 32 that the stamp surface 69 is comprised of glass. Column 17, lines 36-50.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jeans in view of Hamilton(3,362,804).

Jeans teaches all that is claimed except for the use of alignment marks along the stamp surface for aligning with markers along the substrate. Hamilton teaches the use of alignment markers 116 along a stamp surface 114 for aligning with markers 108 along a substrate 110. See column 7, lines 11-32 in Hamilton for example. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the stamp surface and substrate surface with alignment markers as taught by Hamilton in order to accurately locate the stamp surface with respect to the surface of the substrate to ensure the images be printed at the desired locations on the substrate.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ren L. Yan whose telephone number is 571-272-2173. The examiner can normally be reached on 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Nguyen can be reached on 571-272-2258. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
